

## **JENGA: The East Africa Psycho-Social Network**

### **Welcome to Youth 2020: The JENGA VII International Training Workshop on the Psychology & Mental Health of Children & Adolescents**

#### **Why Youth & Mental Health?**

At the JENGA VI Workshop on “Relationships, Sexuality & Gender”, held in Nairobi in February 2019, it was agreed by the **JENGA East Africa Psycho-Social Network** that the next workshop would focus on the Mental Health and Psycho-Social Support (MHPSS) of Youth in East Africa and beyond. Millennials and Gen-Z are facing new challenges, both personal and political (global warming, economic disparity and migration, gender diversity and new technologies) that pose unique opportunities for connection but lead to anxiety and alienation as well. Internet and gaming addictions, sexting and bullying in schools and online, eating disorders and suicidal ideation are just some of the issues facing our youth.

#### **Why Expressive Arts?**

Jungian Psychology takes a developmental perspective of youth mental health, with a focus on the individuation process and creative transformation. Come join us to learn how Expressive Arts, Dream Analysis and a BodyMind Approach to well-being can help youth in their unique journey and can support parents and our own internal processes and promote self-care as mental health practitioners.

#### **Join us for a unique training experience and networking opportunity!**

We invite you to join us for a dynamic and informative exchange of views and we look forward to hearing the perspectives of your clients, families and communities. As our discussions often give rise to deep unconscious material and dreams, we will offer a session on Introduction to Jungian Dream Analysis and close with a Jungian Dream Circle at the end of Day 2. A draft Programme is below.

## **JENGA: The East Africa Psycho-Social Network**

### **JENGA VII Draft Programme** (version 1 September 2019)
